AquaMini User Manual

Colorimetric Device

x 1

Caps

x 2

Containers

x 2

Instructions

x 1

Important

1. Read results in good light to obtain best results.
2. Please store in cool, dry and dark conditions.

Instructions

1. Fully fill each container with water sample.

2. Cap securely (first secure the 1st and last caps, then the middle ones).

3. Shake the capped reaction strip 10 times, turn it upside down, and let it rest in an inverted position for 2 minutes.

4. Shake it again 10 times, and insert it into the device, rotate the color roll and read results.
